

The Front Door to Homeland Security Information

The Homeland Security Information Network (HSIN) is the primary system for real-time information sharing and collaboration among DHS security partners. From every level of government to the private, international and non-profit sectors, HSIN connects partners and streamlines interagency collaboration to advance the homeland security mission.

Trusted and Secure

Ensuring Protected Information Sharing for Mission Partners

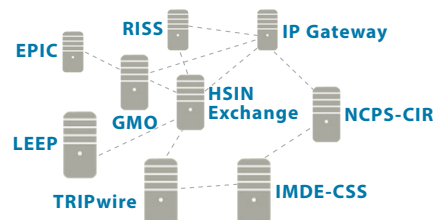

Interoperable

Connecting Diverse Systems and Mission Areas

FEDERATED CONNECTIONS

Simplified access for partner systems: Log in once to securely access vital information and collaborate with other verified partners

PORTAL CONSOLIDATION

Consolidation of unique information sharing systems on HSIN for enhanced information and partner collaboration

Mission-Based

From Planned Events to Incident Response, HSIN Supports Your Mission

Daily Operations

HSIN supports daily operations by providing real-time information sharing capabilities that streamlines processes, improves situational awareness and decision-making capabilities in users' unique areas of operation.

- Cybersecurity
- Counternarcotics
- Border Security
- Combating Transnational Organized Crime
- Infrastructure Protection
- Disaster Planning and Mitigation

Planned Events and Exercises

HSIN brings planning expertise, customizable solutions, experience and the support of HSIN Mission Advocates—subject matter experts on HSIN application—to help ensure the safety and security of planned events and exercises.

- MLB All-Star Game
- Stanley Cup Finals
- State of the Union Address
- Boston Marathon
- Lollapalooza
- North American International Auto Show
- Super Bowls XLVII – XLIII, and more

Incident Management and Emergency Response

Emergency services professional and law enforcement rely on HSIN to help prevent, protect, respond to and recover from unplanned incidents, sharing information in real time to work as a cohesive team.

- Hurricanes Harvey, Irma and Maria
- Santa Fe School Shooting Incident
- Nationwide Law Enforcement Operations
- Las Vegas Mass Shooting Incident
- Kilauea Volcanic Eruption

Features You Need—Security You Can Trust

HSIN Chat

HSIN Chat provides a secure environment for instant messaging, allowing:

- Quick answers to questions
- Real-time information sharing
- Unclogged email inbox
- Chat one-on-one or in groups

HSIN Connect

Robust web conferencing tool provides a secure environment for:

- Virtual, real-time collaboration
- Web-based training
- Large-scale webinars
- Instant analysis and response

HSINbox

Communicate securely with mission partners:

- Secure messaging
- Attaches documents, links, notes
- Managed email distribution

HSIN Learn

Complete solution for rapid, online training designed to help users utilize HSIN:

- Self-paced computer based operational training
- Customized assistance and instructor-led training
- Instruction on how to utilize important HSIN features and build and maintain your community

HSIN Exchange

A secure request for information (RFI) solution:

- Manages and prioritizes RFIs
- Centralizes processes and increases efficiency
- Delivery metrics to avoid duplicative responses
- Secure communications and interoperability across all fusion centers and interagency partners

Geospatial

Mapping capabilities and applications:

- Geographical data sharing from various sources on one display
- Provides mapping of incident scenes and planned event sites
- Tracks movements/changes over time
- Regular weather updates surrounding specific events provides an extra layer of security

HSIN Communities

Collaborative environments that bring together homeland security partners

- Information sharing across public and private sectors, as well as international, territorial and tribal partners
- 24/7 access to a secure, collaborative, web-based information-sharing environment
- Customizable tools and resources
- Mission-based network of homeland security partners
